

Tech Tip

What Computer Should I Get?
Onyx Production House 12.1

Click or Scan this QR code to go to Onyx's Spec Sheet

Hardware Requirements

To keep your ONYX software working at its peak performance, please observe the following minimum requirements:

Onyx Production House software runs on Windows computers only.

Operating System: Windows 10 Pro, 8.1 Pro, 8 Pro, 7 Pro, Enterprise and Ultimate 64 Bit. Home or 32 Bit versions are not recommended.

Processor: Multi-Core - 2 Cores minimum, 4 or more Cores recommended

RAM: 8 GB Minimum, 16 GB or more recommended

Hard Disk Space: 250 GB for OS and product installation. One additional drive recommended for each printer. Because of increased I/O capabilities, the number of physical drives is more important than the capacity of the drives. RAID arrays are not recommended.

Remember that these are only minimum recommendations. You will get better performance if you buy a faster computer with more memory and hard drive space than the minimums recommend.

Note: Internet connection required for updates and online support.
