

EGL ELECTRODES

EGL ADVANTAGE™ ELECTRODES

THE WORLD'S LARGEST MANUFACTURER OF ELECTRODES

EGL electrodes have consistently raised the industry standards for reliability and performance since their introduction in 1930.

To ensure rigid quality control, all phases of manufacturing are performed in-house, including emission coating, inverter welding shells with lead wires, and sealing and centering the mounts in glass envelopes.

Today, EGL manufactures over 75 standard and custom electrodes - the world's broadest line - to satisfy your most specialized requirement without compromise.

The latest addition to the growing family of EGL electrodes is the "ADVANTAGE™" electrode series, combining the features you need for the ultimate in brilliance, clarity, and longevity.

All EGL electrodes are made in the USA and are readily available from your local distributor.
