#300 Glass Housing

Part Number: 38003 Cat#: GH300

The GH300 Glass Housing provides an affordable, safe method for making neon connections. It is made of borosilicate heat resistant glass. The spring contact allows for neon tubes to be easily serviced. It is rated for 7,500 V applications including 15,000 V mid-point referenced transformer installations and comes with a plated steel ferrule to secure the unit to the sign enclosure. The GH300 is especially useful in areas of high humidity and/or bug-infested environments.

1. Mount the housing in a horizontal position or with the opening below the body.
2. Make sure that all minimum distance requirements have been achieved.
3. Wrap the stripped GTO cable once around the screw as shown, under the cup washer. Tighten nut.

These products are Listed to applicable U.S. and Canadian standards and requirements by Underwriters Laboratories, Inc.

	WARNING
	Failure to comply with the required spacing and orientation may result in a potential fire hazard or electrical shock.
