

Hardware Requirements

To keep your SAi software working at its peak performance, we recommend the following settings:

SAi's Flexi software runs on Windows computers only.

Operating System: Windows 10 Pro and Enterprise

RAM: 4 GB Minimum, 8 GB or more recommended

Screen Resolution: 1152 x 854 minimum, with 16-bit color or higher

Install Space: 1GB Free for base program plus extra install space for ICC Profiles

Working Disk Space: 4 GB

Remember that these are only minimum recommendations. You will get better performance if you buy a faster computer with more memory and hard drive space than the minimums recommend.

Note: Internet connection required for Cloud Window features and services as well as license activation.
